

COMMITMENT TO GARDEN FOR WILDLIFE

I am a Proud Member of National Garden Clubs, Inc. and the
_____ Garden Club,
City of _____,
District _____,
State of _____.

I understand that "Wildlife" includes "all plants, fungi and other organisms which grow or live wild in an area without being introduced by humans" and I agree to do my part in protecting their environment and increasing their habitat so that they can thrive and prosper!

I will provide food, water, cover, and a place for wildlife to raise their young in my gardens - I understand that this can be done in even a small container garden and it will still make a huge difference! I will incorporate sustainable gardening practices so that our wildlife will be protected, especially our pollinator friends!

And, I will share the importance of these actions with those around me.

I will BEE A WILDLIFE ACTION HERO!
